Monyx Card

Remotely managed.
More prepaid capabilities.

State-of-the-art wallet technology

Manage Monyx from the Nayax platform:

▶ Smart, online/offline capabilities

▶ Design and remotely update an array of policies and thresholds

▶ Secure, encrypted storage

▶ Online card issuing

PCi DSS Certified | **Visa payWave** | **MasterCard paypass** | **EMVCo**

Only with Nayax

1 | Smart, online/offline capabilities

The Monyx system securely stores all transactions and can be configured to send data to the server at a pre-scheduled time or after a certain number of transactions.

Only with Nayax

2 | Easy activation

Hassle-free card issuing process, simple file upload and the card is activated upon first use.

3 | Lightning-fast transactions

The Monyx application allows fast offline transactions by deducting credit directly from the card.

Only with Nayax

4 | Remote management

Companies can set thresholds, restrict use by hours, days and more, all done remotely from the management system.

5 | A secure, contactless card

Each consumer gets a Monyx Mifare Contactless card, which holds their credit securely on the card.

6 | Easy to add funds

Consumers can use the revalue function to conveniently load their card with more credit by using cash at automated machines.

  all from the comfort of your office

Contactless wallet

Mifare Contactless cards that hold the credit on the card

Offline transactions

Monyx allows offline transactions, which deduct
credit directly from the card, enabling a fast
transaction speed

Monyx also allows the revalue function, which enables
the customer to load the card using cash at the vending
machine.

Smart online/offline

The Monyx system securely stores the transactions and
can be configured to send the data to server at a
pre-scheduled time or after a certain number of
transactions

Loyalty program and rewards

The Monyx systems holds predefined policies that
allow rewards on revalue, discounts on transactions,
happy hour, limitations on machines or specific
products, and more

Web interface management

All policies are managed remotely and conveniently on
the Nayax online server and sent to the relevant
locations that use Monyx.

Online card issuing

The issuing of cards is done online at first purchase.

Using existing cards

Mifare purse (pre-existing) can be utilized with full
Monyx capabilities
